

6 Captain's Challenge: Build the Right Crew for the Job

Marine Month
IN CANADA

You're the Captain of a ship getting ready for a big trip. You'll be transporting a load of grain from Thunder Bay to Montreal. But you can't do it alone — you need a crew!

Instructions (in small groups):

1. Read the role cards provided.
2. As a team, choose two crew members to join your ship.
3. Then answer the following questions (on your own or as a class discussion):

Discussion questions:

1. Which team members did you choose and why?
2. What role does each team member play in making sure the grain gets to its destination?
3. How would your ability to transport the load of grain be impacted if one of the team members you've chosen couldn't do their job?
4. Using the image of the Algoma Mariner, where does each crew member mainly work on the ship?
